

Ultraslim Light Box

The Clip Frame System for Slides and Posters

This **ULTRASLIM LIGHT BOX** range has been developed with the latest illumination diffusion technology allowing the design of the poster boxes to be so thin that it can actually be called an illuminating poster frame.

The framelight systems differentiate themselves from competitors by their contemporary design, ultra slim shape, brightness, consistent light dispersion (no banding) and low electrical consumption.

Applications:
Business center, supermarket, bank, restaurant, snack hall, airport, MRT station, underground, wedding photo and exhibition project etc.
